

## **Environmental and Quality Policy**

- ✓ BATM considers the quality of its products and services as an essential component in its business, and in its accomplishments as a company.
- ✓ Conditions for the company's success: The dedication and professionalism of the company's employees, who are its most important asset, and the ongoing long-term satisfaction of its customers.
- ✓ The Quality System is designed to assure and sustain a high quality level in conformance with the ISO 9001:2015 standard, with the customer's needs, and in the implementation of applicable laws.
- ✓ Company management is committed to assuring that the environmental impact of its products and services fall well within the limits of its environmental policies.
- ✓ Company management is committed to continual improvement in matters of quality, environment, and pollution avoidance.
- ✓ Company management is transforming the company into a world leader in the quality and environmental domains, by integrating Clean-Tech and energy saving technologies into current telecom industry practices.
- ✓ Company management is committed to implementing all legal and other requirements that the company has committed itself to.
- ✓ Company policy maintains frameworks for satisfying environmental targets and goals, as per ISO14001:2015.
- ✓ This policy is transmitted to company employees, customers and all individuals working for or with the company, including contractors and suppliers.
- ✓ This policy provides a suitable basis for managing a quality and environmental program, and provides for periodic audits in the general framework of management audits, and of the company's goals.
